30 PER CENT SAVING TO FARMERS.

-HARE'S PATENT CONCENTRA TED BLOOD MANURE is beyond all doubt the most powerful and valuable Fertilizer ever offered to the public. How long will Agriculturists submit to the Guano Monopoly, whilst they have the above more potent and more Valuable Fertilizer, at thirty per cent. less cost? Read the annexed Certificates and then try it along side of the best Peruvian Guano, and let the result speak for itself. Conficulty of Dr. Hoyes.

The specifications of Dr. Hare and J. Odam, having been submitted to me, I have found the composition of matter on which they are founded to be highly nitrogenous and fermentable compound, containing the essentials of a fertilizer of the highest character, and also the food for sustaining crops to the time of their maturing. I regard this enterprise of manufacturing a erstition, and, also, on Animal Fascination, or guano instead of importing it, a practical and important undertaking, favorably affecting the interests of our common country

Respectfully, A. A. HAYES, M. D. Assayer to State of Massachusetts. Certificate of Professor Booth.

Upon examining the composition of the best Peruvian Guanos, I can perceive no ground for assuming it to be the best that can be made .-ORE NEW BOOKS, MAGAZINES, AND On the contrary, there is always present more or less of superfluous matter, sometimes in large quantity. The composition proposed by Odam & Hare's Patent, is, in my estimation, superior to that of the best Guanos, or to any other artificial manure of which I have heard, and I think myself the more entitled to give this positive opinion, from the unlooked for results but I never heard it called by that name beof the action of sulphuric acid on animal matter, fore; we call it rum!" which I obtained in experiment, but which were anticipated by the Patent in question. Respectfully Yours. JAMES C. BOOTH.

Certificate of Professor Frazer. At the request of parties interested, I have no resitation in stating my opinion, that the mode of preparing an artificial manure, by acting the child very seriously, "Not any good as I ipon animal matters by sulphuric acid, as detailed in Dr. Hare's Patent, and mixing the resulting substance with animal, charcoal and sphate of Lime, is correct in theory, and alhough I have had no opportunity of testing the manure thus formed practically, I have no doubt that a manure formed by the mixture of these ingredients in proper proportions would be found at least to equal in its effects the best JOHN F. A TERRIBLE ENEMY.

Banker, in his late work on Ceylon, states that on one occasion he came across an enormous serpent which lay in his path. His head was about the size of a very small cocoa-nut, divided lengthways, and No. 172, S. E. corner of King and Wash. sts. this was raised to about eighteen inches above the coil. His eyes were fixed upon us, and the forked tongue played in and out of his mouth with a continual hiss .-Aiming at his head, I fired at him with a double-barreled gun, within four paces, and blew his head to pieces. He appeared stone dead; but upon pulling him by the tail, to stretch him out, he wreathed himself into convulsive coils, lashing himself out at full length, mowed down the grass in all directions. This obliged me to stand clear, for his blows were terrific; the thickest part of his body was as thick as a man's thigh. On losing his head, he tore away from the stakes, and although his head was shivered to atoms, and he had lost three feet of his neck by the ball having cut through this part, which separated in tearing off the skin, still he lashed and writhed in a frightful convulsion, continuing till I left
